S78

Performance Brake Caliper

Elevate your ride with the S78 - a sleek, high performance caliper that's built to take on the toughest conditions.

The S78 caliper is engineered to deliver the confidence you need, whether you're carving corners on the track or navigating city streets. Its lightweight, yet incredibly robust construction provides the perfect balance of power and control, letting you push your ride to the limit without holding back.

This caliper is a must-have upgrade for the driving enthusiast who demands nothing less than the best.

Elevate your driving experience and leave the competition in the dust with the S78.

S78

PARAMETER

MOUNT	100mm/108mm
SURFACE TREATMENT	Nickel Plated / Anodized
SEALS	Single Seal
Ø PISTON IN MM	34/34mm
BRAKE CALIPER BODY	Monoblock
NUMBER OF PISTONS	4x 34mm
PISTON MATERIAL	Aluminium With Hard Anodizing
OFFSET IN MM	30mm(100mm)/22.5mm(108mm)
FOR FRICTION SURFACE (MM)	Min 32mm
BRAKE DISC THICKNESS	Min 4.5mm / Max 5.5mm
INCLUDES BRAKE PADS	Yes
PADS THICKNESS	Min 5mm / Max 8mm
WEIGHT:	584g

X80

Performance Brake Caliper

Unleash your racing performance with the X80 caliper - a true masterpiece of engineering.

The X80 caliper is the pinnacle of racing technology. Its robust, monoblock design and oversized pistons deliver uncompromising braking force, allowing you to push your limits with confidence.

Whether you're carving through tight corners or shedding speed for the straight, this caliper will be your unwavering ally, giving you the control you need to dominate the track.

For the discerning enthusiast who refuses to settle, the X80 caliper is an essential upgrade that will transform your ride into a finely-tuned, race-ready machine. Experience the thrill of absolute braking mastery and take your performance to new heights.

X80

PARAMETER

MOUNT	108mm
SURFACE TREATMENT	Nickel Plated / Anodized
SEALS	Single Seal
Ø PISTON IN MM	34/38mm
BRAKE CALIPER BODY	Monoblock
NUMBER OF PISTONS	4 (2x 34mm and 2x 38mm)
PISTON MATERIAL	Titanium With DLC Coating
OFFSET IN MM	22.5mm
FOR FRICTION SURFACE (MM)	Min 30mm
BRAKE DISC THICKNESS	Min 5.5mm / Max 6.75mm
INCLUDES BRAKE PADS	No
PADS THICKNESS	Min 6.5mm / Max 9.5mm
TUV / ABE / KBA	Race Use Only
WEIGHT:	640g

X75

Performance Brake Caliper

Elevate your racing performance with the X75 racing caliper - the pinnacle of braking technology. Engineered for unparalleled power and control, this lightweight, monoblock marvel is the ultimate solution for high-performance driving.

The X75 is the embodiment of precision and control, delivering the confidence you need to push the boundaries of your driving abilities. Its rigid, monoblock construction transforms your vehicle's braking capabilities, allowing you to harness every ounce of power from your high-performance setup. With lightning-fast response and relentless stopping force, the X75 will have you braking later, cornering harder, and leaving the competition in the dust.

Whether you're a seasoned racer or a driving enthusiast seeking to elevate your performance, the X75 racing caliper is the upgrade that will take your driving to new heights. Experience the thrill of uncompromising braking and dominate the track like never before.
